Objective: - Highly motivated Laravel Developer with two years of experience seeking to leverage my skills and knowledge to contribute to the success of a dynamic development team. I am passionate about creating efficient, scalable, and user-friendly web application using Laravel framework.

Technical Skills:

- Proficient in Laravel framework and its ecosystem.
- Strong understanding of object-oriented PHP programming.
- Experience with MySQL and database design.
- Ability to collaborate effectively in team environment.
- Excellent problem-solving and debugging skills.
- Knowledge of front-end technologies such as HTML, CSS, JavaScript.
- Version Control: Git

SDE

Summary

As a highly skilled software developer, I possess a strong command of programming languages such as PHP, C and C++, coupled with expertise in web development frameworks and technologies like Laravel. I am equipped with the ability to quickly adapt to new technologies and contribute to the development of innovative software products.

Work Experience

PHP Developer

Nov-2023 – Sept-2024

TVB Healthcare Services.

- Developed and maintained a website as Elitera using Laravel framework, and WordPress.
- Maintaining a website like TVB Health Care for our company using CI technology.
- Implemented new features and functionalities based on company requirements.

Software Engineer

July-2022 – Oct-2023

Caldera Solution Pvt Ltd.

- Developed and maintained web applications using Laravel framework.
- Collaborated with a team of developers, designers, and project manager to deliver high-quality software solution.
- Implemented new feature and functionalities based on client requirements.
- Conducting thorough testing and debugging to identify and resolve issues and bugs.
- Designed and implemented a custom search algorithm in C++.
- Developed a cross-platform application using the Qt framework, which was successfully deployed on Windows, Linux, and macOS systems.
- Integrated legacy C libraries with modern C++ codebase, using C++ wrappers to ensure seamless interoperability and reduced development time.

Projects:

2022 – 2023

1. TESTCOACH: – Learning Platform website PHP(Laravel)

- Utilized design patterns like MVC to separate presentation and business logic, enhancing maintainability and extensibility.
- Use Blade templates for views and keep them simple and focused on presentation. Avoid adding complex logic or database queries directly in the templates.

2. TEACH UP NOW: – Learning Platform PHP(Laravel)

- ≡ Utilize design patterns like MVC to separate the presentation logic from business logic, allowing for easier maintenance and extensibility.
- ≡ Use Blade templates for views and keep them simple and focused on presentation. Avoid adding complex logic or database queries directly in the templates.

3.Orbis Hr Solutions

PHP(Laravel)

- ≡ Developed an **admin login system** using Laravel's built-in authentication features.
- ≡ Created a **job management interface** where the admin can manage which jobs are visible to users on the website.
- ≡ Built functionality to **publish** or **hide** job listings from the front-end based on admin preferences.
- ≡ Designed a dynamic **job listings page** that fetches active job postings from the database and displays them on The website.
- ≡ Developed a system to filter and paginate the job listings to ensure the page remains user-friendly and optimized.
- ≡ Integrated a feature to allow **users to upload resumes** directly through the job application page.

4.Elitera: – Learning Platform website

PHP(Laravel)

- ≡ Implemented seamless video conferencing functionality within the Elitera platform using JavaScript and Jitsi API in the Laravel framework.
- ≡ Enhanced user experience by enabling real-time interaction between students and instructors through video conferencing.
- ≡ Provided users with downloadable Excel reports, facilitating easy analysis and tracking of learning outcomes.
- ≡ Conducted thorough testing and debugging to maintain high standards of quality and functionality across all implemented features.

Skills: -

PHP(Laravel): Proficient in developing web applications using PHP and Laravel framework. Experience in building RESTful APIs, implementing database models, and handling user authentication and authorization.

C & C++: Strong foundation in C and C++ programming language. Proficient in data structures, and object-oriented programming concepts.

Soft Skill

Problem Solving.
Attention to Detail.

Adaptability.
Collaboration.
Continuous Learning.
Communication.
Time Management

Hard Skill

Software Development
Life Cycle.

Web development.
API Development.
Version Control.
Testing and Debugging

Technical Skill

C & C++
PHP(Laravel)
CodeIgniter
MYSQL
HTML, CSS
JAVASCRIPT
WordPress
